User's Manual

1 GENERAL INFORMATION

This app provides an Android user with information on their battery usage. The app offers a list of apps using battery power, a graphical view of battery usage, and push notifications.

2 Configure Settings

2.1 Set a Threshold

The user can set a threshold on the settings page seen in Figure 1. The user can click and type in a battery percentage.

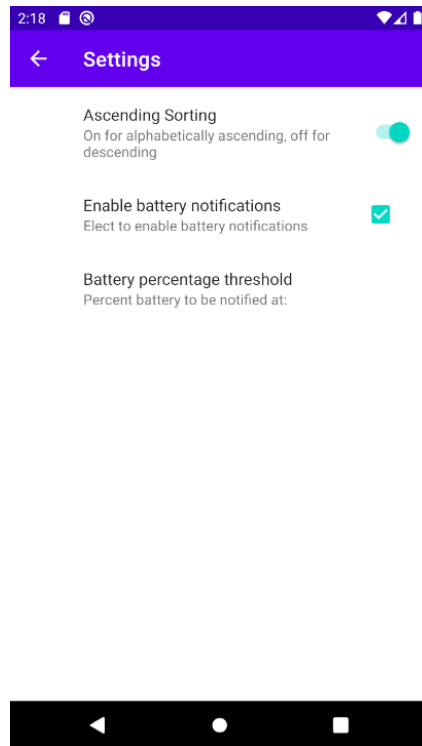

Figure 1 Settings Page

2.2 Sort Alphabetically

The user can toggle the sorting button to see their apps sorted either in alphabetical order or reverse alphabetical or

2.3 Enable Notifications

Notifications can be enabled by checking the box on the settings page as seen in figure 1.

3 USING THE APP

3.1 Tracking battery level

The user can track their current battery level by seeing the battery graphic bar on the main page (see figure 2).

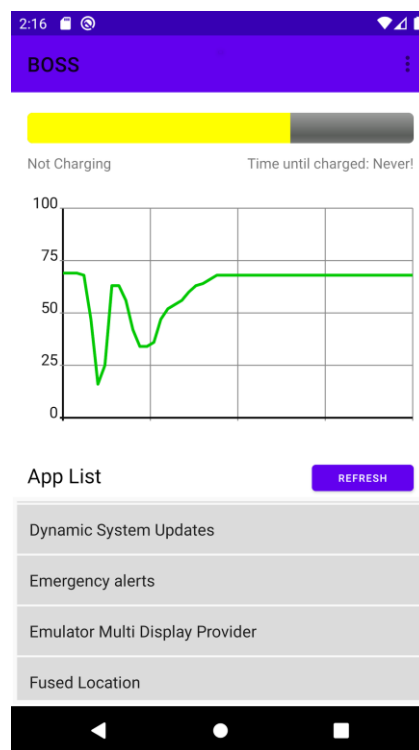

Figure 2 Home page

3.2 Interpreting the Graph

The graph shows the battery percentage on the y axis and the x axis represents time. The graph shows a dynamic representation of the user's battery percentage over time.

3.3 Refreshing the App List

The user can click the "Refresh" button, as seen in Figure 2, to refresh the list of apps that are using battery.
